

Executive Business Case & Funding Proposal: Rayu Corp Enterprise Security Modernization Program

Prepared By: Sebastion Mauldin

Role: Cybersecurity Program Manager

Date: June 2026

Executive Summary

Rayu Corp has experienced rapid growth as a Vertical SaaS provider serving customers across healthcare, financial services, and legal sectors. As customer expectations and security requirements continue to increase, the organization faces growing pressure to demonstrate cybersecurity maturity, operational resilience, and effective risk management.

This business case recommends investment in the Enterprise Security Modernization Program (ESMP), a 12-month initiative designed to strengthen governance, reduce organizational risk, improve customer trust, and support future compliance efforts.

The proposed program requires an estimated investment of \$250,000 and is expected to deliver measurable improvements in risk management, vendor oversight, security awareness, incident response readiness, and customer confidence.

Business Problem

Current organizational challenges include:

- Inconsistent cybersecurity governance processes
- Limited visibility into enterprise security risks
- No formal vendor risk management program
- Increasing customer security questionnaire requests
- Lack of executive cybersecurity reporting
- Incomplete incident response procedures
- Security awareness training gaps

These issues increase the likelihood of security incidents, customer trust concerns, operational disruptions, and lost business opportunities.

Strategic Drivers

The Security Modernization Program supports the following business objectives:

Customer Trust

Improve confidence among prospective and existing customers by demonstrating security maturity.

Risk Reduction

Reduce the likelihood and impact of cybersecurity incidents.

Operational Resilience

Improve organizational preparedness for security events and business disruptions.

Growth Enablement

Support sales and customer success teams by streamlining responses to security assessments and vendor questionnaires.

Compliance Readiness

Prepare the organization for future compliance initiatives and customer-driven security requirements.

Proposed Solution

Implement a structured Enterprise Security Modernization Program focused on:

- Cybersecurity governance
- Enterprise risk management
- Vendor risk management
- Security awareness training
- Incident response improvements
- Security KPI reporting
- Executive security dashboards
- Security program oversight

Estimated Budget

Category	Estimated Cost
Security Awareness Platform	\$25,000
Security Governance Tools	\$40,000
Vendor Risk Management Activities	\$35,000
Security Consulting Support	\$60,000
Incident Response Improvements	\$40,000
Program Management & Reporting	\$50,000

Total Program Budget: \$250,000

Expected Business Benefits

Risk Reduction

- Improved visibility into enterprise risks
- Enhanced vendor security oversight
- Stronger incident response readiness

Revenue Protection

- Reduced likelihood of customer loss due to security concerns
- Improved ability to complete customer security questionnaires

Operational Efficiency

- Standardized governance processes
- Executive visibility into cybersecurity performance

Organizational Maturity

- Security awareness participation exceeding 95%

- Formalized risk management framework
- Established governance review process

Success Metrics

The program will be considered successful if:

- Enterprise risk register is implemented
- Vendor risk management process is operational
- Security awareness participation exceeds 95%
- Executive dashboard is deployed
- Incident response procedures are documented and tested
- Quarterly governance reviews are conducted
- Customer questionnaire response time improves by 50%

Risk of Inaction

Failure to invest in cybersecurity modernization may result in:

- Increased exposure to cybersecurity incidents
- Loss of customer trust
- Delayed sales opportunities
- Inability to meet customer security requirements
- Higher remediation costs following security events
- Reduced organizational resilience

Recommendation

Approve funding and authorization for the Enterprise Security Modernization Program.

The proposed investment will improve cybersecurity governance, strengthen risk management practices, increase customer confidence, and support long-term business growth while reducing organizational risk exposure.
